## PREMIX OF FEED ADDITIVES

### **COMPOSITION** - each one liter contains:

| ITEMS  | AMOUNT     | UNIT | ITEMS   | AMOUNT              | UNIT |
|--|------------|------|---|---------------------|------|
| Sorbitol                                       | 77 000     | mg   | Niacinamide (3a315 Vitamin PP)                | 2 000               | mg   |
| Magnesium Chloride                             | 20 000     | mg   | Amino acids, their salts and a                | nalogues            |      |
| Calcium Chloride                               | 2 000      | mg   | L-Lysine Monohydrochloride                    | 5 000               | mg   |
| Propylene Glycol (1,2 Propanediol)             | 50 000     | mg   | technically pure (3.2.3)                      |                     |      |
| Dextrose                                       | 50 000     | mg   | L-Threonine (3.3.1)                           | 5 000               | mg   |
| Additives per Lt                               |            |      | L-Tryptophan (3.4.1)                          | 3 000               | mg   |
| Vitamins and provitamins                       |            |      | DL-Methionine, technically pure               | 300                 | mg   |
| Vitamin A Retinyl Palmitate (3a 672b)          | 12 000 000 | I.U. | (3c301)                                       |                     |      |
| Vitamin D3 (E 671)                             | 3 200 000  | I.U. | Natural or corresponding synthe-              |                     |      |
| Vitamin E/dl-alpha-tocopheryl acetate          | 5 000      | mg   | tic chemically defined flavouri<br>L-Arginine | <b>ngs</b><br>1 000 | mg   |
| (3a700) Vitamin K (Menadione Sodium Bisulfite) | 1 000      | mg   | L-Glutamic Acid                               | 2 000               | mg   |
| Vitamin B1 Thiamine Mononitrate (3a821)        | 1 000      | mg   | Glycine                                       | 10 000              | mg   |
| Vitamin B2 (Riboflavin)                        | 10         | mg   | <b>Preservatives</b>                          |                     |      |
| Vitamin B12 (Cyanocobalamin)                   | 25         | mg   | Sodium Citrates (E_331)                       | 2 500               | mg   |
| Calcium D-Pantothenate (3a841)                 | 1 000      | mg   | Sodium Propionate (E 281)                     | 2 500               | mg   |
| Vitamin B6/Pyridoxine Hydrochloride (3a831)    | 1 800      | mg   | Potassium Citrates (E 332)                    | 25 000              | mg   |
| Chemically well-defined substances             |            |      | Sorbic Acid (E 200)                           | 500                 | mg   |
| having a similar biological effect of vitamins |            |      | Carrier                                       |                     |      |
|  |            |      | Demineralized water up to                     | Qsp                 | 1 Lt |

#### Dosage:

For oral administration via drinking water -

Poultry and Turkey: 1 Lt / 4.000 liters of drinking water for 5 - 7 days

Foals, Calves, Goats and Sheep:  $1 - 2 \, \text{ml} / 20 \, \text{kg}$  body weight for  $3 - 5 \, \text{days}$
